

## Cloud Hosting

# Cloud Hosting with true network integration

Claranet’s Infrastructure-as-a-Service (IaaS) platform provides you with greater freedom and security when configuring your applications in the cloud. MPLS network integration allows you to migrate applications to a Claranet UK data centre, but still integrate those applications with existing services and networking.

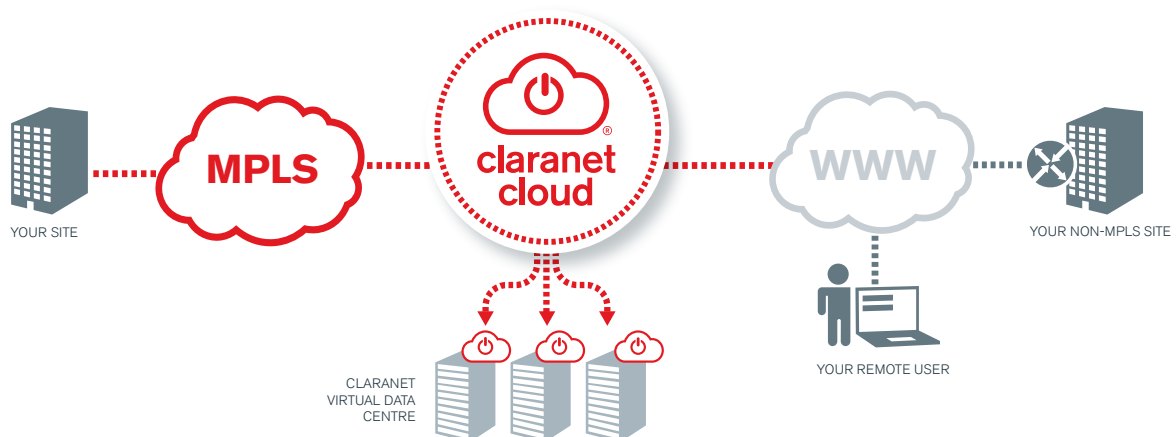

### Why choose Claranet for Cloud Hosting?

- Recognised as a leader by Gartner
- UK and European data centres
- UK support 24x7x365
- Wide range of hosting services and management options
- Holistic service experience: hosting and networks

### UK accountability and ease of migration give you real control

### Cloud Hosting service overview

- Award-winning self-service IaaS portal experience
- Claranet manage the platform up to the hypervisor
- Library of virtual machine templates included
- Public cloud, private cloud or hybrid cloud solutions
- Flexible “pay for what you use” billing
- PCI DSS certified services
- Single portal view across your services

# How we work with you

## 1 - Design

We have designed a flexible cloud hosting platform which integrates, not only with our hosting, networks and communications services, but also with your existing environment.

## 2 - Build

We continually invest in the cloud platform to meet the needs of UK businesses like you.

## 3 - Manage

We take care of the ongoing 24x7 management and monitoring of the IaaS platform. However, you retain the control and UK support you need.

## 4 - Evolve

We are available to work with you to ensure your service continually meets your needs.

# Cloud Hosting business benefits

### Scaling

Rapid scaling of capacity and resource helps to optimise costs

### Control

We look after the platform, you keep control

### Compliance

In-country PCI DSS certified data centres
