

Connecting your business to private and public clouds

Bring your hybrid-cloud connectivity to life

Businesses are increasingly deploying and consuming IT infrastructure across multiple environments. From Software as a Service, Public & Private clouds, to traditional on-premise datacentres. Ensuring these dispersed environments can efficiently and securely communicate to one another is paramount to success of your business.

Claranets Cloud Connect X service brings your hybrid cloud strategy to life by providing a scalable, secure and private network backbone that underpins your IT infrastructure. This service allows you to select the right IT environment for your application workloads. Giving you the peace of mind of a scalable performant low latency and secure service.

Service Summary:

- One service with access to multiple cloud providers (Microsoft Azure, Amazon Web Services and Google Cloud Platform integrated)
- Other SaaS, IaaS, PaaS or 3rd Party Datacenter integration available
