

Cloud Connect X

High performance private connections to your public cloud services

We connect your private MPLS network directly into your public cloud Microsoft Azure and Amazon Web Services. You can now use these public web services securely and conveniently within your corporate network, with all data charges included – meaning there are no nasty surprise monthly charges. Benefit from the high-performance transfer of data between your environments at a predictable monthly fee.

Why choose Claranet Cloud Connect X?

- Direct connection to your MPLS network
- No additional data charges
- Just choose bandwidth required - no bearer install cost

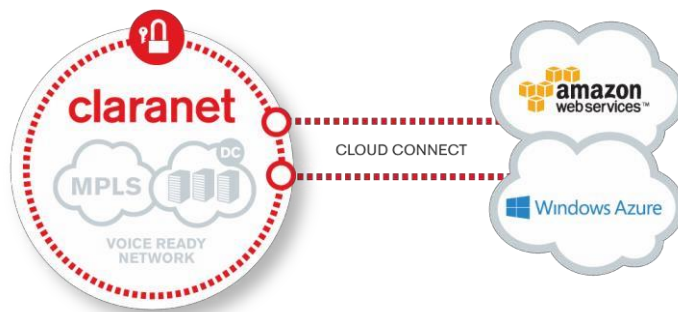

Direct, private connection to Microsoft Azure and Amazon Web Services

Cloud Connect service overview

- One connection for multiple cloud services: Microsoft Azure, Amazon Web Services
- No need for separate bearers means lead-time is days, not months
- Direct connection to your core corporate MPLS network
- Links from London and Amsterdam
- Secure private connection
- Lower latency compared with VPN
- High availability 99.99% SLA
- No data usage charges

Options

- Flexible “pay for what you use” billing
- PCI DSS certified services
- Single portal view across your services

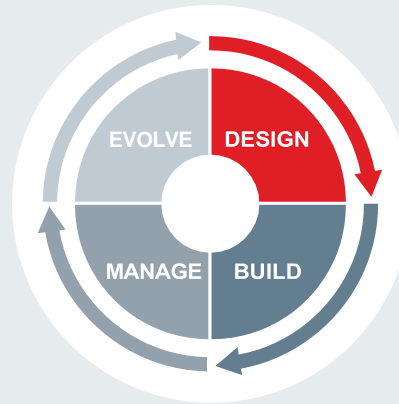

How we work with you

1 - Design

Our experts advise you on which of our Cloud Connect services is best suited to your business needs.

2 - Build

Working with Claranet removes the burden of provisioning of your public cloud connection yourself, saving you time.

3 - Manage

We take care of the ongoing 24x7 management and monitoring of the IaaS platform. However, you retain the control and UK support you need.

4 - Evolve

We work with you to ensure your service continually meets your needs.
